BUREAU OF STATISTICS

GROSS DOMESTIC PRODUCT BY INDUSTRY

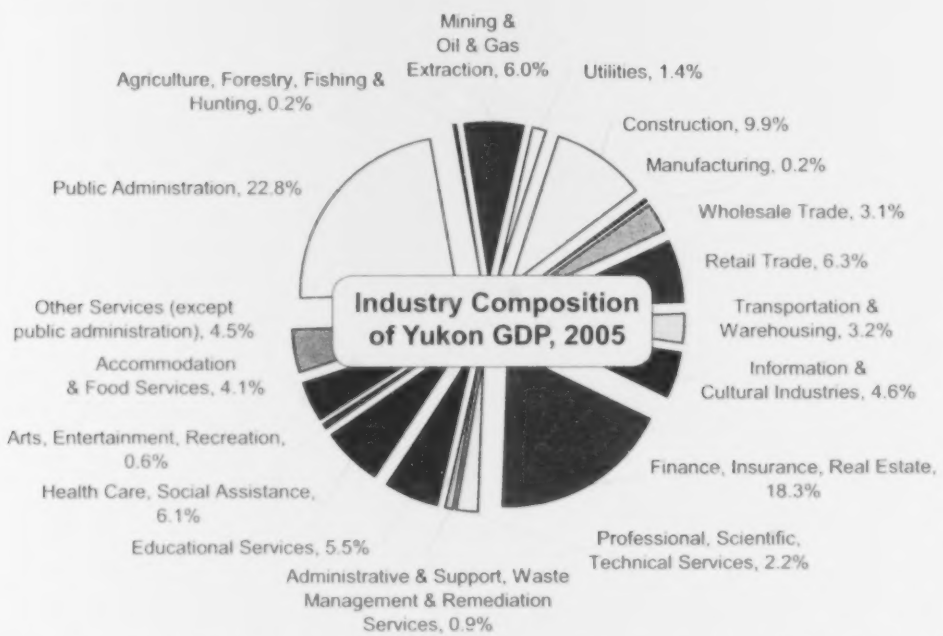
2005

Total Yukon GDP by Industry, 2005	$1,165,800,000
Growth Rate from 2004 to 2005	4.9%

The Gross Domestic Product of an industry represents the value added by labour and capital in transforming inputs purchased from other industries into output.

2005 Highlights

The Yukon's Gross Domestic Product by Industry rose $54.3 million, or 4.9%, in 2005 after increasing 4.6% in 2004. In 2005, the largest dollar value increases were seen in the *construction* and the *finance & insuance, etc.* sectors. Construction increased by $25.3 million, or 27.1% over 2004. **This was due in large part to construction for the Canada Winter Games facilities**, however; residential construction was also up $3.5 million, or 11.4%, over 2004. In 2005, the finance & insurance, etc. sector increased by $12.9 million, or 6.2%, over 2004. There was also an increase in the public administration sector, the largest sector, increasing from $265.3 million in 2004 to $273.1 million in 2005, an increase of $7.8 million, or 2.9%.



Industry Composition of Yukon GDP, 2005
Mining & Oil & Gas Extraction, 6.0%
Utilities, 1.4%
Agriculture, Forestry, Fishing & Hunting, 0.2%
Construction, 9.9%
Manufacturing, 0.2%
Public Administration, 22.8%
Wholesale Trade, 3.1%
Retail Trade, 6.3%
Other Services (except public administration), 4.5%
Transportation & Warehousing, 3.2%
Accommodation & Food Services, 4.1%
Information & Cultural Industries, 4.6%
Arts, Entertainment, Recreation, 0.6%
Finance, Insurance, Real Estate, 18.3%
Health Care, Social Assistance, 6.1%
Educational Services, 5.5%
Professional, Scientific, Technical Services, 2.2%
Administrative & Support, Waste Management & Remediation Services, 0.9%

Note: Percentages are based on the sum of industry GDP figures, which does not equal the "Total Industry" figure. See page 8 for further detail.

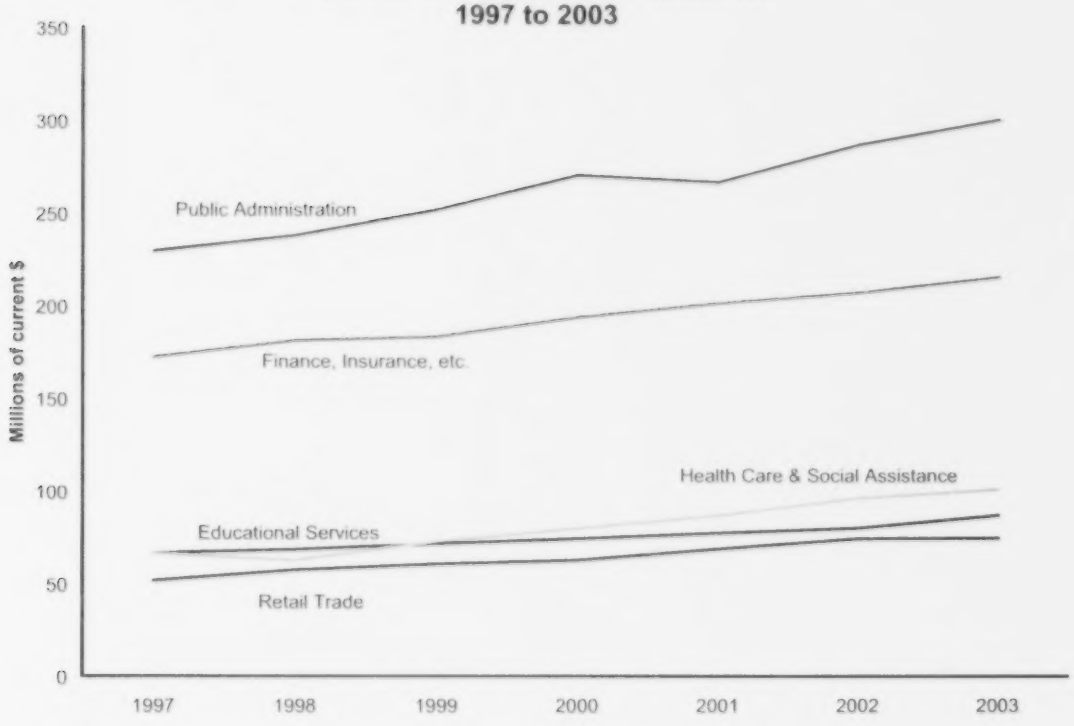
Nominal GDP by Selected Industries 1997 to 2003



This analytical report presents Statistics Canada's latest estimates of Yukon's Real GDP by industry in chained 1997 (**inflation-adjusted**) dollars for 2000–2005 and Nominal GDP by industry in current (**not adjusted for inflation**) dollars for 2000–2003. The figures are subject to revision.

Statistics Canada has adopted the chain Fisher volume index method of calculating the inflation-adjusted, or real, gross domestic product (GDP). The reason for the adoption of this method is twofold: it produces the most accurate measure of growth in GDP and its components; and the change brings the Canadian measure in line with the US quarterly Income and Product Accounts which also use the chain Fisher formula to measure real GDP. Use of the chain Fisher index has also been recommended by the United Nations "System of National Accounts 1993," chapter 16.

An important consequence of using chain indexes is that the associated volume measures are not additive. That is, the sum of the chained values for each component of an aggregate does not equal the chained value of the aggregate.

For example, the sum of the components of the Transportation & Warehousing Industry is not equal to the number given for that industry, just as the sum of the industries is not equal to the number given for All Industries.

For more information, visit: http://www.statcan.ca/english/concepts/chainfisher/methodology.htm

The estimates contained in this publication are produced by Statistics Canada's Input-Output Division, and are reconciled with the overall provincial/territorial GDP figures produced by Statistics Canada's Income and Expenditure Accounts Division (IEAD). While the general concepts followed in compiling these estimates are consistent with those underlying the IEAD, there still remains conceptual differences between the GDP at market prices and GDP at basic prices. For more information, refer to: http://www.statcan.ca/english/neacen/gloss/ima.htm

All of the GDP estimates in this publication are measured in basic prices.

Note on the definition of the Public Administration Industry: Economic units (companies or establishments) are classified together in the same industry if they are engaged in the same or a similar kind of economic activity. The industrial grouping does not depend upon whether the activity is carried on by a government agency or by a business enterprise. Because so much of the activity commonly understood as 'government' is reallocated and assigned to its related industrial group in the industrial distribution, the 'Public Administration' industry shown in these tables provides a limited view of the full range of government activity. It includes only those establishments of government which clearly do not belong to any other branch of economic activity, but which are essentially concerned with general administration, the internal service agencies of the public sector, and defence.
